

Tips for Assessing and Documenting Diagnoses

- **Conduct** comprehensive assessments every year.
- **Include** assessment of:
 - All chronic conditions annually (Ex: CHF, diabetes, COPD)
 - Co-existing acute conditions (Ex: protein calorie malnutrition)
 - Active status conditions (Ex: amputations, HIV, dialysis)
 - Pertinent past conditions (Ex: old MI and other underlying medical problems)
 - Medications that may indicate other conditions
- **Document:**
 - Specific rather than general conditions (Ex: major depression rather than depression, if applicable)
 - Causality (Ex: diabetic neuropathy, not diabetes and neuropathy)
 - The reason for the visit, the care rendered, and the conclusion and diagnoses
- **Submit** all diagnoses to HPSM on your claims.
