

HEDIS® 2017 Measure Details

Adult BMI Assessment (ABA)

Members 18-74 years of age whose body mass index (BMI) was documented during the measurement year or the year prior to the measurement year.

Medical record documentation must include:

- For members 20 years and older on the date of service, include documentation of height, weight, and *BMI value*
- For members younger than 20 years on the date of service, include height, weight, and *BMI percentile*.

Controlling High Blood Pressure (CBP)

Members 18-85 years of age with diagnosis of hypertension (HTN) prior to June 30 of the measurement year and who's BP was adequately controlled.

Medical record documentation must include the most recent BP reading (date and result) in the measurement year **AFTER** the diagnosis of HTN is made.

- 18-59 years: BP control is <140/90 mm Hg
- 60-85 years: with HTN and diabetes, control is < 140/90 mm Hg
- 60-85 years: with HTN but no diabetes, control is < 150/90 mm Hg.

Cervical Cancer Screening (CCS)

Female members 21-64 years of age who were screened for cervical cancer using either of the following criteria:

- 21-64 years: cervical cytology performed every 3 years
- 30-64 years: cervical cytology and human papillomavirus (HPV) co-testing every 5 years

Medical record documentation must include the date and result of the cervical cancer screening tests. Members may be excluded with proper documentation of a hysterectomy (with removal of cervix) any time in member's history through 12/31 of the measurement year.

NOTE: Co-testing requires two separate tests. Reflex testing is excluded.

Comprehensive Diabetes Care (CDC)

Members 18-75 with diabetes (Type I and Type 2) who had each of the following:

- Hemoglobin A1c testing
- Eye exam (retinal)
- Medical attention for nephropathy
- BP control <140/90 mm Hg.

Medical record documentation must include:

- Most recent A1c lab test with date and result
- All eye care specialist reports from the measurement year or year prior
- Evidence of attention for nephropathy.
- Most recent blood pressure readings

Colorectal Cancer Screening (COL)

Members 50-75 years of age who had appropriate screening for colorectal cancer.

Medical record documentation must include evidence of one of the following:

- Colonoscopy (within last 10 years)
- FOBT (gFOBT or iFOBT in the measurement year)
- Flexible Sigmoidoscopy (within last 5 years).

Childhood Immunization Status (CIS)

Percentage of children who had all of the required immunizations on or before their 2nd birthday.

Medical record documentation must include:

- One (1) MMR (Measles, Mumps, Rubella)
- One (1) VZV (Varicella)
- Two (2) Influenza (Influenza; Flu)
- Three (3) HEP B (Hepatitis B)
- Three (3) IPV (Polio)
- Three (3) HiB (Haemophilus B)
- Four (4) DTaP (Diphtheria, Tetanus, Acellular Pertussis)
- Four (4) PCV (Pneumococcal).

Immunizations for Adolescents (IMA)

Adolescents 13 years of age who received meningococcal, Tdap, and 3 HPV vaccines on or before their 13th birthday.

Medical record documentation must include:

- A note or certificate of immunization indicating the name of the specific antigen and the date of the immunization.
- A certificate of immunization prepared by an authorized health care provider or agency, including the specific dates and types of immunizations administered.

Prenatal and Postpartum Care (PPC)

This composite measure aims to provide relevant and comparable data regarding timeliness of prenatal care and postpartum care.

Medical record documentation must include:

- Prenatal Care: Prenatal visit within 42 days of enrollment or during the first trimester.
- Postpartum Care: Post-partum visit within 21-56 days of delivery.

NOTE: A post C-section incision check does not constitute a postpartum visit.

Medication Reconciliation Post-Discharge (MRP)

Members 18 years and older with discharges (acute and non-acute inpatient) from January 1-December 1 of the measurement year, for whom medications were reconciled the date of discharge through 30 days after discharge (31 days total).

Medical record documentation must include:

- Evidence of medication reconciliation AND the date when it was performed.
- Must be conducted by a prescribing practitioner, clinical pharmacist, or RN.
- Only documentation in the outpatient chart meets the intent of the measure, but an outpatient visit is not required.

Well-Child Visits in the 3rd, 4th, 5th, & 6th Years of Life (W34)

Members 3-6 years of age who had one or more well-child visits with a PCP during the measurement year.

Medical record documentation must include ALL of the following:

- A health history
- A physical development history
- A mental development history
- A physical exam
- Evidence of health education/anticipatory guidance.

Weight Assessment & Counseling for Nutrition & Physical Activity for Children/Adolescents (WCC)

Members 3-17 years of age who had an outpatient visit with a PCP or OB/GYN with all required components.

Medical record documentation must include:

- Date of service, height, weight, and BMI percentile.
- Counseling for Nutrition
- Counseling for Physical Activity.

Care for Older Adults (COA)

Member 66 years of age and older who had each of the following:

- Advance Care Planning
- Medication Review
- Functional Assessment
- Pain Screening

Medical record documentation must include:

- Evidence of advance care planning during the measurement year
- Both of the following on the same date of service:
 - ◆ At least one medication review conducted by a prescribing practitioner or clinical pharmacist.
 - ◆ The presence of a medication list in the medical record.
- At least one functional status assessment during the measurement year.
- At least one pain assessment during the measurement year.
